DIVERSIFIED ANNOUNCES RE-ALLOCATION OF RESOURCES

SCRANTON, Pa.–November 13, 2008–Diversified Information Technologies, a leading provider of automated information-management solutions, headquartered in Scranton, Pa. with 18 U.S. and three international locations, announced today through its President and CEO, Scott Byers, the elimination of 16 positions and the reallocation of these resources to support the organization’s recently approved strategic plan. The new strategy, approved by the Board in October, will strengthen Diversified’s mission of perfecting business processes and ensuring compliance for clients’ information management needs using best-in-class automated solutions driven by industry expertise in the insurance, financial services, healthcare, and government sectors.

According to Byers, “The majority of positions were support functions; additionally, there were several positions that worked directly with clients. Ultimately, we combined the resources of departments that were doing the same work, eliminated redundancies, and increased the level of talent and quality in the resulting units. The net effect is that we have pooled the talent into a unified team that is better able to consistently address all, not just some, of our clients’ needs.”

“We know that these actions impact the lives of the people whose positions were eliminated, and Diversified does not take these matters lightly. We have taken steps to ensure the best transition possible for our departing employees. It is my responsibility to make sure that Diversified has the resources to execute on the strategy that was approved by our Board. Diversified’s improvement and growth benefits our current and future clients, our employees, and our shareholders,” Byers concluded.

Questions can be directed to Josephine Panganiban at the email address listed above.
