Diversified Information Technologies, Inc. Announces Partnership with ENERGY STAR®

SCRANTON, Pa.–May 6, 2008–Diversified Information Technologies, Inc. today announced a fundamental commitment to protect the environment by becoming an ENERGY STAR Partner. Diversified’s voluntary partnership with the U.S. Environmental Protection Agency’s ENERGY STAR program means that we will be working toward improved energy efficiency and performance in all facets of our operations. We believe that an organization-wide energy management approach will help us preserve the environment for future generations.

“We are very excited to be an ENERGY STAR Partner, because the program fits so well into our overall commitment to being a ‘green’ organization,” stated Diversified Chairman Clifford K. Melberger. “We also hope that the environmentally-sound services we provide will help our customers achieve their own green initiatives.”

As part of our partnership with ENERGY STAR, Diversified will commit to:

- Measuring and tracking the energy performance of our facilities at all locations
- Setting goals to improve the energy efficiency of our buildings by 10 percent or more, in support of the ENERGY STAR Challenge
- Encouraging our staff and community to learn about the benefits of energy efficiency and to implement appropriate energy efficiency measures
- Encouraging other companies and vendors with whom we work to take the ENERGY STAR Challenge

To help our clients achieve their own environmental initiatives, we also offer green business solutions. Diversified’s green services include: scan on demand, NetView workflow processing, secure document destruction and online data backup. These services improve internal processes and reduce waste by reducing the number of times a document is printed or photocopied and the fuel necessary to deliver an archived document back and forth to an organization. Benefits to our customers include improved risk management, more efficient workflow, better tracking of files and fewer human touch points.

Diversified is working to enhance our Highly Protected Risk rated facilities nationwide in order to earn the prestigious Energy Star Award. To further show our environmental commitment, we are also a member of the United States Green Building Council (USGBC), one of the premier organizations dedicated to sustainable building design and construction. Since joining USGBC in 2006, we have been focused on LEED certification for all new facility construction.

About Diversified Information Technologies

Headquartered in Scranton, Pennsylvania and founded in 1982, Diversified Information Technologies helps clients transfer paper-based file management systems to a secure, electronic environment, allowing its customers to access and share files, invoices and other documents. In addition, Diversified provides availability solutions, electronic mailroom processing, automated forms and healthcare claims processing, and archival records storage. For more information, visit www.diversifiedweb.com.

About ENERGY STAR

ENERGY STAR is a voluntary partnership between businesses, government and others united to protect our environment for future generations by changing to energy-efficient practices today. ENERGY STAR works with more than 9,000 partners to improve the energy efficiency of products, homes, buildings and businesses. Businesses can use ENERGY STAR to improve efficiency, enhance profits, and create a competitive advantage. In 2006 alone, ENERGY STAR helped businesses and consumers save more than \$14 billion in energy costs while reducing global warming emissions equivalent to those from 25 million vehicles.
