

FOR IMMEDIATE RELEASE

Date: 15 June, 2009

Sale of Minnesota Facility

Scranton, Pa. - June 15, 2009 - Diversified Information Technologies announced today through its President and CEO, Scott Byers, that it has sold its facility in Cannon Falls, MN. "The primary driver for this sale was our desire to leverage our systems, resources, and expertise for the benefit of our clients. With the sale of the Cannon Falls location, we are creating a strengthened regional site in Louisville, KY that will serve as a hub to service our clients' information management needs in cities such as Indianapolis, Nashville, Cincinnati, Cleveland, Pittsburgh, and points in-between. The central location of our Louisville, KY facility made it an ideal site for a stronger operational hub in the mid-West", Byers said. "These actions support the strategic plan approved by the Board in October 2008 which contemplated a multi-year timeframe to relocate regional operations to a more central hub. Centralizing our operations will allow Diversified to further strengthen its presence in the Maine to Miami corridor where many of the headquarters of corporations in the industries we serve are located", Byers added.

Diversified has mobilized its relocation project team and will implement its standard relocation procedures to transition all records and documents from the Cannon Falls, MN location to the Louisville, KY center. "The movement of critical client information will take place as smoothly as we have done so many times before. This is our expertise and our clients know this for a fact." Leo Malsky, Vice President of Operations concluded.
